

Supplemental Figure S1. *smg1* plants are partially resistant to the unfolded protein inducing drug AZC. **(A)** Three week old plants grown on 10 mM AZC or proline (control). Scale bar is 1 mm. **(B)** Moss colony size on 10 mM AZC or proline (control). n = 6-12. Asterisks indicate conditions with a statistically significant difference from WT (DMSO solvent control) using an unpaired *t* test (**p* < 0.05; ***p* < 0.01; ****p* < 0.001; *****p* < 0.0001).
