

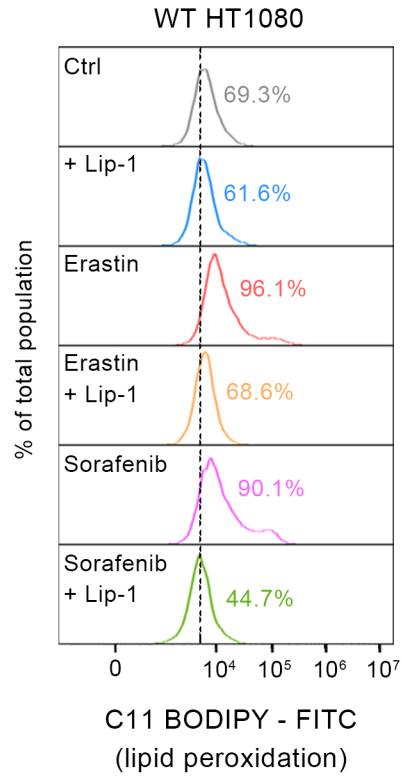

Figure S1

**Fig. S1 Sorafenib induces lipid peroxidation in HT1080 cells.** Lipid peroxidation assessed by C11 BODIPY using flow cytometry in WT HT1080 cells treated with 10  $\mu$ M erastin or sorafenib, in the absence or presence of 1  $\mu$ M lipoxstatin-1 (Lip-1) for 4 h. Data are presented from one representative of three independent experiments.

Figure S2

Fig. S2 Erastin induces loss of GSH in erastin-resistant cell lines. Intracellular reduced glutathione (GSH) levels in WT HT1080, Huh7, and MDA-MB-436 cells exposed to 10  $\mu$ M erastin for 3 h. Data are presented as mean  $\pm$  s.d. of n = 3 10-cm dishes from one representative of two independent experiments.
