OPEN Author Correction: Blood and adipose tissue steroid metabolomics and mRNA expression of steroidogenic enzymes in periparturient dairy cows differing in body condition

K. Schuh, S. Häussler, H. Sadri, C. Prehn, J. Lintelmann, J. Adamski, C. Koch, D. Frieten, M. H. Ghaffari, G. Dusel & H. Sauerwein

Correction to: Scientific Reports https://doi.org/10.1038/s41598-022-06014-z, published online 10 February 2022

The original version of this Article contained errors in Figure 3 where the panels (q) and (r) with the two hormones, estrone and estradiol, were omitted. The original Figure 3 and accompanying legend appear below.

The original Article has been corrected.

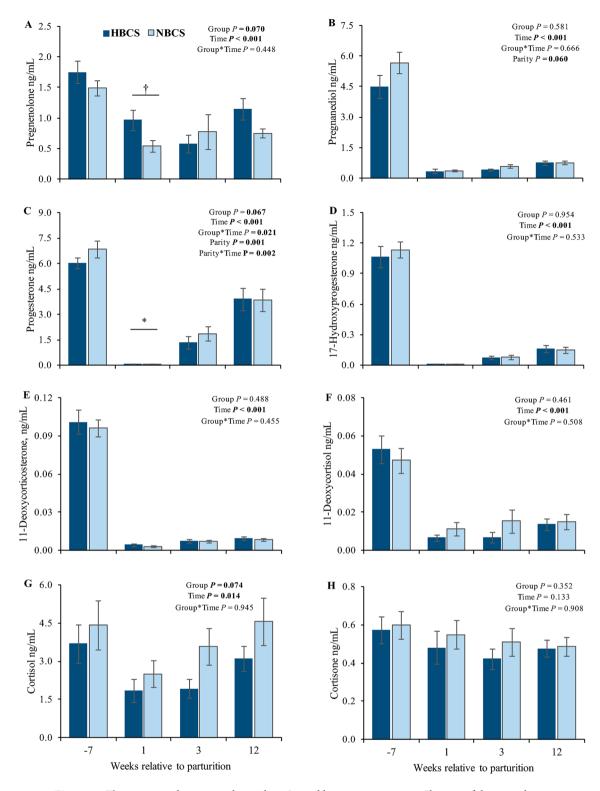

Figure 3. The caption to be typeset alongside it: Steroid hormones in serum. Changes of the steroid concentrations (ng/mL) in serum of cows with normal versus high body condition score (NBCS, HBCS) at week 7 ante partum, as well as week 1, 3 and 12 postpartum. Data are given as means ± SEM. Asterisks (*) indicate differences (P≤0.05) between HBCS and NBCS cows within the time points. Trends (P≤0.10) for differences between the groups are indicated by daggers (†).

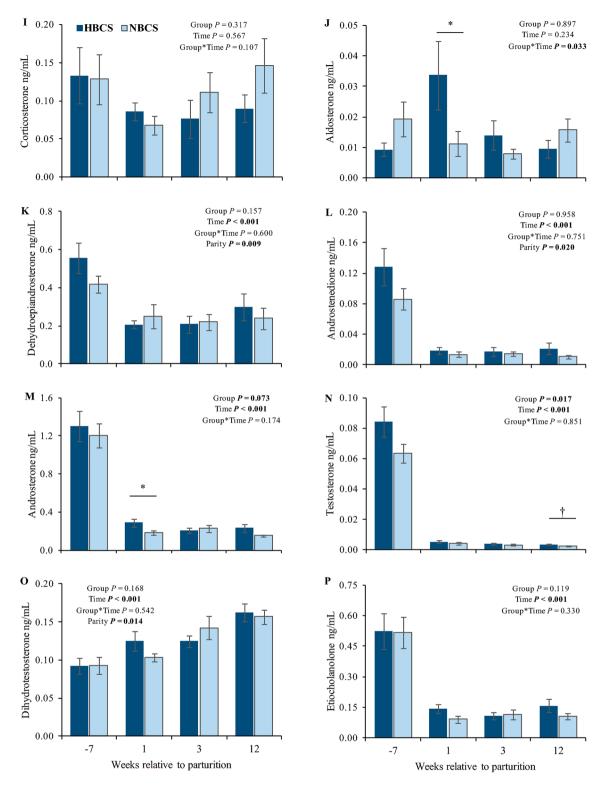

Figure 3. (continued)
