

Supplementary Figure S1. Decreased expression of galectin-3 declines proliferation of immortalized RPE cells in vitro. BrdU ELISA of ARPE-19, ARPE-19/FACS and ARPE-19/LGALS3^{+/-} cells following incubation in cell culture medium without supplemented for 72 h with and without various concentration of hr-galectin-3. Mean ± SD; * $p < 0.05$; ** $p < 0.01$; *** $p < 0.001$; **** $p < 0.0001$. $n = 28$ of at least 4 independent experiments.
