

Correction to Estimating the Absorption of Soil-Derived Uranium in Humans

Stephan C. Träber, Vera Höllriegl,* W. B. Li, Uta Czeslik, Werner Rühm, Uwe Oeh, and Bernhard Michalke

Environ. Sci. Technol. **2014**, 48, 14721–14727; DOI: 10.1021/es504171r

In the text, at page 14725, right column, line 19 and 20, the units are incorrectly given ($\mu\text{g}/\text{day}$ instead of ng/day). The amended sentence is

“Thereby, the daily urinary excretion values of ^{238}U over 3 days before healing soil ingestion were $3.9 \text{ ng}/\text{day} \pm 1.5 \text{ ng}/\text{day}$, $8.1 \text{ ng}/\text{day} \pm 0.6 \text{ ng}/\text{day}$ and $9.0 \text{ ng}/\text{day} \pm 1.2 \text{ ng}/\text{day}$ (mean $\pm$ SD).”
